

Solution Architecture

Date	28 June 2026
Team ID	
Project Name	Rising Waters
Maximum Marks	5 Marks

Solution Architecture Diagram:

Provide a high-level visual representation of your solution's architecture. Use the structural layout below as a template to map out your Presentation Layer, Application Layer, and Data Layer. Fill in the specific technologies and components for your project directly into the boxes to create your architectural diagram.

Component Description Table

Component Name	Description / Role in Architecture	Technologies Used
Presentation Layer	Provides a user-friendly interface to enter weather parameters and display flood prediction results.	HTML, CSS, JavaScript
API Gateway	Handles user requests and routes them to the machine learning model.	Flask
Core Logic Service	Processes input data and predicts flood occurrence using trained ML models.	Python, Scikit-learn, Joblib
Database / Storage	Stores historical flood dataset and trained model for prediction.	Excel (.xlsx), Pickle (.pkl)
